### **DETAILED ACTION**

1. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest a photosensor system comprising: a photosensor array; image reading means; pre-reading means for causing the subject image to be read by different regions of the photosensor array using different image reading sensitivities in at a plurality of stages, prior to an image reading operation by image reading means; optimal reading sensitivity extraction means for extracting an optimal image reading sensitivity suitable for the image reading operation based on a comparison of predetermined measurement amounts which relate to image patterns of the subject image read by said pre-reading means and which correspond to the different regions of the photosensor array; and reading sensitivity setting means for setting the optimal image reading sensitivity to a reading sensitivity of said image reading means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
